SUMMARY

Passionate and dedicated Software Engineer focused on designing and building efficient, scalable, and reliable server-side applications. Strong problem-solving skills with a deep understanding of system architecture, clean code principles, and best practices. Committed to continuous learning and delivering high-quality solutions in collaborative, fast-paced environments.

EDUCATION

Bachelor of Computer Science
Higher Technological Institute, 10th of Ramadan City -2022

EXPERIENCE

Software Engineer | Nahr Development Software and Marketing Company — Remote
May 2025 – Present

- Developing and maintaining secure, scalable web applications using PHP and Laravel.
- Designing and optimizing database schemas for performance and scalability.
- Building efficient RESTful APIs and integrating advanced Laravel features.
- Applying clean architecture principles to ensure code is reusable, testable, and maintainable.

Software Engineer | Tech Village Software and Marketing Company — New Cairo
Oct 2024 – Mar 2025

- Built robust server-side applications using PHP and Laravel.
- Managed and optimized MySQL databases with a focus on performance.
- Integrated third-party APIs to expand platform functionality.
- Applied debugging and troubleshooting techniques to deliver reliable solutions.

TECHNICAL SKILLS

Languages: PHP, JavaScript, Python
Back-end: Laravel, Node.js, Express.js, REST APIs, MVC, Queue Workers, WebSockets, Cron Jobs
Front-end: HTML, CSS, JavaScript, Bootstrap, Tailwind CSS, AJAX, React.js, Vue.js, Livewire
Databases: MySQL, MongoDB, Redis
DevOps & Deployment: Docker, Docker Compose, Nginx, Apache, Vercel, Git, GitHub, AWS Cloud Provider
Integrations & Services: Payment Gateways, Twilio, Firebase, RabbitMQ, FFmpeg, Video/Camera Integration, Postman

COURSES & CERTIFICATIONS

- **CLS Learning Solutions —** PHP, OOP, Laravel, MySQL, RESTful API
- **SENIOR STEPS —** HTML, CSS, Bootstrap, JavaScript, React.js
- **Udemy —** Laravel Pizza Ordering Web Application (Ranjeet Karki)

PROJECTS

Node-JS CRM System: Developed a CRM system for managing customers and sales using Node.js, Express.js, and MongoDB. The project provides a complete REST API for managing users, customers, and leads, with JWT authentication, password hashing, and role-based access control for Admin, Sales, and User roles. *[Link]*

MAS-FM : Built a modular Laravel home-services platform with REST APIs for a mobile app and an admin dashboard. Implemented OTP/Sanctum authentication, booking workflow, technician assignment, order tracking, loyalty points, promo codes, referrals, notifications, multilingual CMS, RBAC permissions, and analytics reports using Repository/Service architecture and MySQL. *[Link]*

Nesba — Integrated Educational Management System: Developed a comprehensive educational management platform using Laravel and MySQL to streamline the administration of courses and student data. Designed and implemented a robust database schema to manage student enrollment, academic progress tracking, course scheduling, and certification workflows efficiently. Optimized platform features to simplify the tracking of payments and certification processes. *[Link]*

Full-Featured E-learning & Consultation Platform: Built a high-availability e-learning system using Laravel that supports both synchronous live and asynchronous pre-recorded course delivery. Executed seamless Zoom API integration for automated scheduling and management of live virtual classrooms and consultation sessions. Implemented a Digital Library module for secure management and distribution of learning resources including videos, documents, and quizzes. *[Link]*

Airgate — Hajj/Pilgrim Logistics and Movement Tracking System: Engineered a specialized system for a shipping company to efficiently track pilgrim movements, accommodation assignments, and baggage. Developed data visualization dashboards to provide administrators with real-time reports on pilgrim locations and service allocation status. Ensured high data integrity and security for sensitive tracking information, supporting rapid response to logistical changes. *[Link]*

Multi-Vendor Store — Multi-Vendor E-commerce Marketplace: Developed a large-scale e-commerce marketplace using Laravel that empowers multiple independent vendors to manage their stores and products. Implemented a complex role-based permissions system to clearly separate access control for Super Admins and Vendors. *[Link]*
